

# Find Your Perfect Rug

## Try This

If your room is big enough, use a large rug. Select a size that allows all your furniture to rest inside the perimeter. The front and back legs rest on the rug with space behind and around them. **Consider 10'x14' or 9'x12' rugs.**

## Or This

If you need a smaller rug for space's sake, make sure the front legs of your furniture rest on your rug, this will anchor your rug in your room. **You could try a 5'x8' if you have smaller furniture or an 8'x10'.**

## Avoid This

If possible, skip the too-small rug that only fits beneath your coffee table. The feet of your furniture should always anchor the rug. **If you have larger furniture skip the 5'x8' and 4'x6'.**
